QUALITY ASSURANCE FRAMEWORK SESSIONS FOR COMMUNITY LANGUAGE SCHOOLS - JOURNEY CONTINUES

Quality Assurance Framework Workshop sessions continue to attract interest from community languages schools in Australia.

Sessions were recently held in Brisbane on May 7 2008, Sydney May 19, 2008. A further session is planned for Sydney on May 26, 2008. The session in Melbourne will be held on May 29, 2008. Dr Bob Carbines from Erebus is conducting these sessions.

Community Languages Australia Executive Director Stefan Romaniw visited the Sydney session on Monday May 19, 2008. Together with NSWFCLS President Albert Vella they reinforced the message of the importance for schools to undertake this professional development. Schools are committing to implementing this Framework at school level

This Framework will give the whole school community - administrators, teachers, parents, students and community members, an opportunity to work together to strengthen school planning and to deliver quality programs which in return lead to better student results. This will take some time.

Community Languages Australia and Erebus are committed to working with schools and travel that journey together.

A 2008-2011 timeline is in place to have the Framework implemented nationally

Schools are encouraged to take on this journey and to send at least one representative
